

Rubber Nursery General Worker- Theory Paper

NOS	PC	Difficulty Level	Question Text	Answer Choice 1	Answer Choice 2	Answer Choice 3 (optional)	Answer Choice 4 (optional)	Answer Choice 5 (optional)
RSC/N6010	PC1	MEDIUM	Identify the role of a Rubber Nursery Worker	Sorting and Storage of seeds	Washing trees	Cleaning of woods	Sorting books	
RSC/N6010	PC3	EASY	What is the storage time period of the Rubber Seed?	Temporary	Permenant	5 Years	Ten years	
RSC/N6010	PC5	EASY	What is to be prepared to germinate the Rubber seeds?	Preparation of land and germination beds	Tapping	Cutting	Weaving	
RSC / N5005	PC1	EASY	Identify the natural resource that can be managed for rubber planting?	Smoke	Soil resource	Air	Fire	
RSC / N5005	PC3	EASY	How to avoid the soil erosion?	Water level can be adjusted	Thickness of bed can be changed	By pouring oil	By using the correct method while bed preparation	
RSC / N5005	PC4	EASY	How to minimize the soil erosion during bed preparation ?	Through water pollution	Drainage should be proper	Drainage can be made as you like	Drainage is not required	
RSC / N5006	PC2	DIFFICULT	What is to be done after conducting experiments?	Marks	Feed back to higher authorities	Order	Disorder	
RSC / N5006	PC1	EASY	Identify the work which is not suitable for nursery management.	To do innovation	To improve quality	To reduce cost	Entertainment	
RSC / N5006	PC4	DIFFICULT	Identify the major nursery pests	Crickets	Defoliators	Sapsukers	Grasshoppers	
RSC / N5006	PC3	EASY	Is nursery worker have the responsibility to implement the approved projects/innovation?	Yes,of course	No need	Not essential	Not necessary	

Rubber Nursery Heneral Worker - Practical cum viva

Practical cum Viva

S.no	NOS	Question	Rubrics	Equipment
1	RSC/N6010	Perform the task of mulching in the nursery.	1. The candidate should understand the synthetic and natural mulching and its difference 2. The candidate should uproot all the weeds and start the mulching process 3. The candidate should make the bed of mulch 4. The candidate should eliminate stress in the root of the plants 5. The candidate should cover the area with rubber mulch for synthetic mulching 6. Candidate should proper use shading for the young plant	1. Synthetic mulch like poly sheets 2. Natural mulch like bark of trees 3. Digging tools 4. Poly bag 5. Mulch material such as dry leaf, peat, etc.
2	RSC/N6010	Knowledge on quality of seeds and sorting them	Limited Knowledge on seeds Fair Knowledge on seeds Good Knowledge on seeds High Degree of Knowledge on seeds
